Portable Air Jacks - A Quick, Solid Solution for Lifting Needs

Walled Lake, Michigan, July 9, 2007. Herkules Equipment Corporation offers convenient, portable Air Jacks that are a compact and powerful tool for raising, supporting, and positioning vehicles for repair work. The Air Jacks feature an internal stabilizing cylinder ensuring secure, solid positioning. Dual safety valves prevent both over-inflation and uncontrolled deflation. They are easy to use and virtually maintenance-free.

Two sizes are available. The AJ2 is equipped with 2 air bags and has a closed height of 6-1/2" and a raised height of 13". The AJ3 is equipped with 3 air bags and has a closed height of 7-7/8" and a raised height of 19-1/4". Both have a capacity of 4500 lbs. A psi of 90-110 is required.

The Air Jacks are light-weight yet provide heavy-duty results. Ideal for positioning on frame machines to install pinch weld clamps, or for just a quick and safe tire repair, Herkules Air Jacks can save time and are cost effective.

They are 100% air operated and simple to use. Just attach to an air line. Optional accessories include a two inch and a four inch extension for increasing the raised height, and a pinchweld adaptor.

For more product information please contact Herkules at **800-444-4351**, or at info@herkules.us. Visit our website at www.herkules.us

Herkules Equipment Corporation, established in 1984, is a leading manufacturer for the Automotive Paint & Body Repair industry, having designed, manufactured, and patented the first Paint Gun Washer. We have been manufacturing pneumatic lifting equipment for over 20 years, providing Vehicle Lifts for the automotive aftermarket, and Lifting Systems for the manufacturing industry. Herkules also supplies Handling Equipment, Crushing Equipment, Infrared Curing Lamps, and Vacuum/Dust Extraction Systems.
