Herkules New Manual Waterborne Paint Gun Washer

Walled Lake, Michigan, March 12, 2008. Herkules Equipment Corporation introduces **The G510 Waterborne Paint Gun Washer** to answer the needs of shops converting to waterborne paints. The G510 provides paint technicians a quick and thorough method for manually cleaning all waterborne paint equipment, saving them valuable time for focusing on quality paint jobs. The G510 is easy to use and only requires water for cleaning.

Since waterborne paint sets so fast, the aggressive bristles on the flow-through brush effectively remove any stubborn paint. The water filter system provides a safe and easy disposal method of all discarded paint. Other features of The Herkules G510, including the air dry gun, and the quick clean rinse, provide shops with the most advanced tools for cleaning waterborne paint off of spray gun equipment.

Herkules' extremely reliable diaphragm pump is covered with a three year warranty providing shop owners confidence that they have invested in a trusted name in the paint gun washer business.

Herkules Equipment Corporation, established in 1984, is a leading manufacturer for the Automotive Paint & Body Repair industry, having designed, manufactured, and patented the first Paint Gun Washer. We have been manufacturing pneumatic lifting equipment for 20 plus years, marketing to the PBE industry, and also to the industrial/manufacturing industries for numerous applications. Herkules also supplies Air Jacks, Handling Equipment, and Crushing Equipment.

For more product information, please contact Herkules at **800-444-4351**, or at info@herkules.us or visit our website at www.herkules.us.
