**Herkules Pit Boss
Low Profile, High Capacity Lift For Tire Rotations**

Walled Lake, Michigan. December 14, 2006. The Herkules' **Pit Boss** is a 100% air-operated, 8,000 lb Capacity Vehicle Lift, and consists of two lift platforms, one stationed on each side of a 'Quick Lube' pit, that raises vehicles vertically with no rearward movement. The low profile, 4.25", allows even the lowest clearance vehicles to drive on with ease.

Herkules Proprietary Air Bag Technology is incorporated into the Lift, and provides high lifting capacity while eliminating the hazards and maintenance problems associated with hydraulics or electricity. There is no need to replace costly cylinders or messy fluids The Air Bags are maintenance-free, and are protected from over-inflation by an air-release valve.

Other features include: Solid safety stops providing numerous working heights; Easy-to-use dual controls allowing stabilization of offset loads; Rubber Blocks to protect from metal to metal contact; 100 psi requirement; In-ground installation available; Higher capacities available.

Herkules' series of "Pit Boss" vehicle lifts cater specifically toward the Oil Change, and Tire Service markets.

For more product information, please contact Herkules at **800-444-4351**, or at info@herkules.us or visit our website at www.herkules.us.

Herkules Equipment Corporation, established in 1984, is a leading manufacturer for the Automotive Paint & Body Repair industry, having designed, manufactured, and patented the first Paint Gun Washer. We have been manufacturing pneumatic lifting equipment for over 20 years, providing Vehicle Lifts for the automotive aftermarket, and also Lifting Systems for the manufacturing industry. Herkules also supplies Air Jacks, Handling Equipment, Crushing Equipment, Infrared Curing Lamps, and Vacuum/Dust Extraction Systems.
